

## TP3

### GDPR

GDPR is a law that was created to protect our data in Europe. When a company is collecting or using data, they have to follow this law. In this way data privacy and security is provided. It was created the 25th may of 2018. Before that, the European convention on human rights that was working for data but it was not really defined, it was only about privacy.

You can see all my work for this TP in the branches TP2 or at this link: <https://github.com/cfelgines/digital-traces/tree/TP2>

### Google Trend

You can find this part at the end of the file 'main.py' or at the page: <https://yzo137.deta.dev/trendgoogle>

### Timer log

For this part, you will find everything in the notebook 'TP3-Timerlog.ipynb'.
